EDUCATION

University of Minnesota – Twin Cities

B.A. Computer Science & Minor in Statistics

Minneapolis, MN

Dec 2025

EXPERIENCE

JP's Coatings

June 2019 – Present

Painter/Project Lead

- Coordinate inventory, team schedules, and timelines for commercial projects to ensure high-quality delivery
- Maintain strong rapport with project managers, providing clear communication throughout project lifecycles

University of Minnesota – College of Science and Engineering

Jan 2025 – Dec 2025

Teaching Assistant

- Explained technical concepts to 100+ students, improving comprehension and engagement with course material
- Hosted 3-4 weekly office hours and review sessions, supporting 15-30 students individually
- Delivered technical support to resolve Docker containerization and cross-platform environment issue

Ostra Cybersecurity

May 2025 – Aug 2025

IT Operations Intern

- Configured secure workspace environments across Windows and macOS for 300+ enterprise endpoints
- Created documentation of installation steps and client configurations to support internal knowledge sharing
- Partnered across teams to manage incident lifecycles, identifying and remediating system vulnerabilities

Wright County Community Action

Jan 2025 – July 2026

(VITA) Tax Preparer

- Prepared and reviewed tax returns for low-income households, thoroughly ensuring accuracy and completeness
- Processed returns efficiently using IRS-certified tax preparation software while maintaining strict confidentiality

PROJECTS

Personal Finance Tracker – Flask, React, PostgreSQL

- Built a data-driven web app to support transaction tracking, dynamic budgeting, and spending analysis
- Implemented JWT-secured authentication and an ETL pipeline with data validation for importing transactions

Bid Pricing Calculator – Microsoft Excel (Pivot Tables, Formulas)

- Built an estimating tool to reduce estimate errors and standardize cost calculations across roofing jobs
- Designed dependent data validation chains to prevent invalid product—roof-type combinations

Cognitive Workload Detection – Python, scikit-learn, PyTorch

- Aggregated multimodal physiological data into unified datasets across calming and vexing music conditions
- Engineered feature sets and benchmarked 5 model architectures to predict cognitive workload intensity

Drone Weather Simulation – C++, Git, Docker, Agile/Scrum

- Architected a drone simulation using design patterns to manage entity interactions and environmental logic
- Conducted root cause analysis to resolve logic and performance issues within pathfinding algorithms

SKILLS

Programming Languages & Tools: C, C++, Python, JavaScript, TypeScript, HTML/CSS, SQL, Docker, Git

Software Development: ETL Pipelines, Object-oriented Design, SOLID Principles, Data Structures & Algorithms

Frameworks & Libraries: React, Flask, PostgreSQL, PyTorch, Pandas, NumPy, scikit-learn

IT Operations & Support: Windows OS, MS Office 365, macOS, Hardware Provisioning, Endpoint Configuration, Troubleshooting & Debugging, Incident Lifecycle Management, Technical Documentation, Data Security
